One thing that seems weird: Why would EPA deliver water? Is this something EPA has done before? Thanks, Mark

Hey Mark,

We're actively reviewing the situation and filling information gaps. We're evaluating next step including sampling some of the residences' well water. We have not made a decision to provide water at this time. Will keep you posted. But call me on my cell if you need to chat, I'm working from home today.

Lots going on with this fracking/Dimock stuff. Can you call me about water shipments, well testing, etc? Thanks, Mark
